Prathamesh Vatkar

prathamvatkar6604@gmail.com +91-8767087776 Leetcode prathamesh-vatkar-3a905030b vatkarpratham66

Summary

Full-stack developer skilled in **MERN**, **DSA**, and **AI/ML**. Experienced in building **scalable web applications** and **ML-driven intelligent solutions**. Strong in **problem-solving**, clean architecture, and real-world product development. Passionate about creating efficient, user-focused systems with modern technologies.

Education

Bharati Vidyapeeth's *Nov 2022 – Present*
B.Tech in Computer Science(AI-ML) CGPA:7.8 /10.0

Experience

Web Development Intern *Remote*
Mascot Software Technologies,Kolhapur *Aug 2025 – Oct 2025*

- Contributing to **full-stack development using the MERN Stack**, including building responsive UIs, integrating REST APIs, and developing **scalable backend services**.
- Optimizing MongoDB queries to improve application performance while gaining hands-on experience.

Software Development Intern *Remote*
Adhyayan Education Services Pvt. Ltd *Nov 2024 – Dec 2024*

- Built and maintained educational modules in Core Java. Improved debugging and object-oriented programming skills.

Projects

Needo.com – Local Donation Marketplace *Github repo*

- Built a **city donation marketplace (Needo.com)** using the **MERN stack with ML integration**, featuring secure user authentication, CRUD listings, and **ML-based image verification** to ensure genuine item uploads.
- Implemented a **responsive UI with search and filter functionality**, improving user experience and enabling efficient discovery of local donation items through NGO collaboration

Disease Prediction System .

- Built ML health prediction models using **Python, Scikit-learn, and Streamlit** for Diabetes, Heart Disease, and Parkinson's
- Added **data preprocessing, model evaluation**, and a **real-time prediction UI** for quick health risk analysis .

RentHub – Digital Item Listing Platformndar *Github repo*

- Developed a platform where users can **log in, upload items, write reviews, and manage listings** with complete CRUD functionality.
- Designed a smooth interface that allows people to **list, explore, and interact with items or spaces** easily.

EduGuard AI – AI-Powered Student Dropout Prediction & Counseling System(In Progress)

Skills

Programming Languages : Java, Python
Web development : MERN Stack (MongoDB, Express.js, React, Node.js), HTML, CSS
AIML : Pandas, NumPy, Matplotlib, Scikit-Learn, EDA, Supervised/Unsupervised ML Models
Database and Backend : MongoDB, Express, Node, MySQL
Tools and Platforms: Git, GitHub, REST APIs, Postman, VS Code
Other Skills: Data Structures, SDLC, Operating Systems, Computer Networks, DBMS
Soft Skills: Team Leadership, Communication, Problem Solving, Collaboration, Analytical Thinking, Consistency, Discipline.

Accomplishments & Activities

- **SIH 2024 Participant (Team Leader):** Led the development of an AI-Powered Student Dropout Prediction & Counseling System.
- **Startup Sphere Participant:** Presented innovative project ideas and real-world tech solutions.
- **Python Warrior Competitor:** Demonstrated strong Python fundamentals and practical problem-solving skills.
- **Coding Competitions:** Actively practiced DSA through problem-solving on platforms like LeetCode and striver A2Z dsa sheet
